Work

INSCALE

FullStack Developer

2016-10-01 - Present

<https://www.inscale.net/>

Enterprise ERP solution

- Maintain and improve
- Introduce new features
- Multiple Web API endpoints with .NET
- Web app with AngularJS
- Unit tests with MSTest
- TFS as source control
- Build pipeline on TFS

Endava

.NET Developer

2015-07-01 - 2016-10-01

<http://www.endava.com>

Endava is a multinational corporation with world wide spread offices. It's a large outsourcing organization that is based on several core values that all employees must have. My job there was to work on several projects (but one at a time), some commercial, some internal and one research project. Working with great people with lots of experience is what I found there and I have consumed much knowledge during my stay. Of that I am grateful.

- Middleware software for a large insurance company built in .NET
- Application for launching games and keeping track of statistics for a nonprofit organization. Everything built with JavaScript (nodeJS + Angular)
- Web based game for a nonprofit organization. Built with JavaScript
- HoloLens Kanban whiteboard - proof of concept application. Built with Unity

Freelance Programmer

FullStack Developer

2015-03-18 - Present

<https://www.upwork.com/>

Part of an insurance company software. To be more specific the data collecting, report generating and dashboard parts of the system.

- Amazon AWS
- Web API with .NET
- Web app with Angular
- Report generator
- GIT as source control

Aspekt

.NET Developer

2012-06-01 - 2015-07-01

<http://aspekt.mk>

We always remember our first time. So I remember "Aspekt" as my first professional programming experience. Large microcredit/leasing COTS is what I found there in the beginning. Started with development on new features and fixing stuff as a junior, to upgrading the whole system to a newer platform as a semi – senior. Of course I was not alone there, we were a whole team of developers, supported by business analysts and project managers, backed by some large microcredit / leasing clients.

- Started with development on new features and fixing stuff as a junior, to upgrading the whole system to a newer platform as a semi – senior.
- One of the core developers on the project.
- Supported the project until everything was delivered and operating as expected.
- System built on .NET

Education

University Sts. Cyril and
Methodius - Skopje, Macedonia

2008-10-01 - 2012-12-03

- 28 engineering courses
- 8 mathematical courses

Skills

Microsoft Technologies

Expert

- .NET
- ASP.NET MVC
- WebApi 2
- SQL Server
- EntityFramework
- IIS (Internet Information Server)
- WCF (Windows Communication Foundation)
- TFS (Team Foundation Server)

JavaScript Technologies

Expert

- NodeJS
- AngularJS / Angular
- Jasmine / Mocha
- Karma
- Protractor
- TypeScript
- Grunt / Gulp / Webpack

Version Control

Expert

- git
- TFS

Cloud

Experienced

- AWS
- Azure

Languages

Macedonian

Native speaker

English

Master

Interests

Board Games

- 7 Wonders
- Alchemists

Video Games

- Diablo Universe
- WarCraft Universe

- Risk 2210 AD
- Terra Mystica
- Trajan
- Tzolkin: The Mayan Calendar

- League of Legends
- Witcher 3
- Dark Souls

Food

- Coffee
- Burgers
- Coke
- Cake

Reading

- Technical
- Belles-lettres

References

Dimcevski is a highly motivated developer who never steps back at any tasks, regardless of their difficulty. The modern day geek which is highly sought for in any shop/company carries with him his knowledge, experience and fearlessness, along with a high sense of awareness to new ways of solving old problems. Therefore, if knowledge, experience, fearlessness and a new way of thinking and problem solving is what you are seeking for, Dimcevski is your go-to developer.
